Intuit Master Builder is an integrated business management and accounting system for general and engineering contractors and subcontractors of all trades. The software includes estimating, scheduling, project management, equipment management, payroll, accounts payable, accounts receivable and general ledger. Specialized billing modules are available for AIA, unitary, time and materials, progress, and service billing to meet the needs of many different types of contractors.

The comprehensive nature of Intuit Master Builder eliminates the need for contractors to acquire, learn and link multiple software programs in order to achieve accurate project tracking and accounting. In addition, Intuit Master Builder is one of the few Microsoft® Windows™ compatible software programs designed for the construction industry with such a wide array of features and modules.

Intuit Master Builder Version 10 is sold on a per seat basis and includes the following modules: General Ledger, Accounts Receivable, Accounts Payable, Payroll, Project Management, Scheduling, and Equipment Management. Add-on modules are sold separately and include: Estimating, Service Receivables, Inventory, and Document Control. Key features include: purchase orders, subcontracts, change orders, job cost and reporting, construction-specific billing and customizable reports.

Product updates and upgrades are included as part of an annual product and program support.

Applications

CONCLUSION In many respects, B-O-T reflects an industry gone full circle.
The **master builder** /architect originally employed hundreds of years ago
has reemerged in the role of B-O...to Purchaser. In addition, if Purchaser
requests, Seller will furnish to Purchaser copies of all **draw requests**
which are submitted to Seller's Lender in connection with the construction,
and all inspection...
